

Weekly Shopping Lists

Each list covers every recipe cooked that week for two people, including the batches that feed the following days and the freezer; leftovers are not listed twice. Cross off what is already in the cupboard. **Every week, as well:** two litres of milk for the tea; a bag of frozen berries; lemons and limes; a dozen eggs beyond the ones listed; a spare tub of low-fat Greek yogurt; a jar of almonds and one of walnuts; and a bag of frozen cauliflower rice for the nights the fresh head is too much trouble. Amounts are rounded up to what you can actually buy.

My Own Week

Write your own week from the recipes you liked. The rules: carbohydrate counted and steady (breakfast 20 to 40 g, lunch 30 to 45, dinner 35 to 50, snacks under 20); slow carbohydrate, not fast; protein at every meal; vegetables first, starch last; nothing sugary to drink; the walk after the biggest meal. Aim for 130 to 160 g of carbohydrate and 30 g of fibre a day, and 20 g or more of protein at every meal.

Glucose, Weight and Habit Tracker

My last HbA1c: _____ (date _____). My target HbA1c (agreed with the doctor): _____.
Weight / waist at the start: _____ / _____. Blood pressure: _____. My medicines (metformin?
insulin? sulfonylurea? SGLT2? GLP-1? blood pressure?): _____. Next HbA1c due: _____

Paired readings (if you have a meter or a sensor)

Before breakfast, and two hours after the start of the biggest meal, for fourteen days; write the meal beside the reading. The targets most guidelines give for older adults with type 2 diabetes: fasting 80 to 130 mg/dL (4.4 to 7.2 mmol/L); two hours after a meal under 180 (10.0); never under 70 (3.9). A meal that takes you over 200 (11.1) twice is a meal to change; a reading under 70 is a call to the nurse about the medicines.

The Fridge Card: Keep, Limit, Avoid

Cut out and keep on the fridge. Targets: 130 to 160 g of carbohydrate a day, slow and spread; 30 g of fibre; 20 g or more of protein at every meal; 5 to 10 per cent of body weight off if there is weight to lose (15 per cent is where remission becomes possible); 150 minutes of walking a week; the walk after the biggest meal.

Keep (every day)	Limit (measure it)	Avoid
Vegetables at every meal, half the plate, eaten first: leafy greens, broccoli, cauliflower, peppers, tomatoes, courgette, green beans, mushrooms, salad	Wholegrains: oats, barley, brown rice, wholewheat bread and pasta, quinoa: a fist, not a plate (30 to 45 g of carbohydrate)	Sugary drinks, fruit juice, smoothies from a bottle, energy drinks, sweetened coffee drinks
Protein at every meal: eggs, fish, chicken, turkey, Greek yogurt, cottage cheese, beans, lentils, tofu, nuts	Potatoes and sweet potatoes: one small, with the skin, or half a large	White bread, white rice, white pasta, breakfast cereals, crackers, rice cakes by the packet
Beans, lentils and chickpeas most days: the slowest carbohydrate there is	Fruit: two or three small pieces a day, whole, with nuts or after a meal; berries, apples, pears, oranges, cherries first	Pastries, biscuits, cakes, sweets, chocolate bars, ice cream, 'low-fat' sweetened yogurts
Nuts and seeds daily: almonds, walnuts, flaxseed, chia, pumpkin	Bananas, grapes, mango, pineapple: half, or a small handful	Dried fruit by the handful; honey, syrup, agave, 'natural' sugars
Extra virgin olive oil; avocado; oily fish twice a week	Milk: in the tea; a glass with a meal	Processed meat: bacon, ham, sausages, salami
Water; tea and coffee with milk; the walk; the sleep	Dark chocolate (70 per cent): two squares after a meal	Fried food, chips, crisps, takeaways more than once a fortnight
Cinnamon, vinegar, lemon, herbs and spices	Alcohol: at most one drink a day, with food, dry; several drink-free days	Crash diets, juice fasts and 'diabetic' foods with sugar alcohols

The five rules: the starch measured; protein at every meal; vegetables first; nothing sugary to drink; the walk after the biggest meal.

The swaps that halve the carbohydrate: cauliflower rice for rice; lentil pasta or courgette ribbons for half the pasta; half-and-half cauliflower mash; one slice of bread, open, not two; a wrap, not two; beans in place of the potato; berries in place of the banana.

Call the doctor or nurse for readings over 250 mg/dL (13.9 mmol/L) that do not come down, or over 300 (16.7) once; for thirst, passing water often, blurred vision, vomiting or weight loss without trying; for any reading under 70 (3.9), especially with shaking, sweating or confusion (eat 15 g of fast sugar, recheck in fifteen minutes, and tell the nurse the same day); when you are ill and cannot eat (the sick-day rules, Chapter 9); for numb or tingling feet, a wound on the foot that does not heal in a few days, or chest pain; and before the next review if you have lost weight and take insulin, a sulfonylurea or a blood pressure tablet, because the doses may need to come down.
